Coopers by passion

## WOLFSBERG

Wolfsberg is often described as the paradise of Carinthia; it is situated in Lavanttal, the most fascinating valley in Austria. On clear days the snow-capped Alps can be seen reflected in the blue waters of the lakes.

The particular Alpine climate, sunny but with a fresh mountain breeze is the ideal condition for the seasoning and maturation of wood.

Winter snow and summer rain guarantee the cleansing of the hardest wood tannins so only the more delicate continue to mature in our wood, waiting to yield into your wines.

COOPERS BY PASSION

## CRAFTSMANSHIP TRADITION

Our company of craftsman coopers, Pauscha Austria, has been producing casks, vats and barriques for the refinery of wines and spirits.

We select prime quality Austrian oak from the nearby Stiria, Germany, central France or Eastern Europe which we leave in the open-air to season for long years.

We only work with quarter-sawn wood for the barrels and split wood for the barriques so the fibres are always parallel and the yielding process is more delicate and constant.

The wood is naturally seasoned in mountain air to ensure perfect maturation.

“... as skilled coopers  
we make barrels  
like bespoke clothes,  
made to measure  
for our customers ...”

CoC ZERTIFIKAT

## OUR BARRIQUES & TONNEAUX

Our barriques are unique pieces and are handmade using the best split oak. Toasting is controlled with laser sensors to guarantee a constant temperature on the wood. Only in this way can we toast the core.

After toasting we install the bottoms and finish them off to make them perfect. They are all tested with an exclusive pressure system.

Pauscha barriques are made exclusively from natural and certified products, so that your wines can be oxygenated and aged perfectly.

## OUR CASKS

Our round or oval casks are hand-made with quarter-sawn oak.

Our coopers use fire to bend the resistant fibres; the toasting is then carried out if requested by our customer.

The casks are refined by hand with great care and passion to make them perfect both inside, so they are easy to clean, and outside so they are magnificent to see in your cellars.

They come complete with made-to-measure supports and a variety of accessories in stainless steel.

## OUR VATS

We recommend our vats for the fermentation of wine as wood has a naturally stabilising effect on wine.

We always use wood from nearby Stiria (Austria), Germany, France or Eastern Europe.

Vats are all made and refined by hand, taking particular care of the inside so the wine-making process is as easy as the cleaning of the cellar.

Accessories in stainless steel and appropriate supports are available for all vats.

## ACCESSORIES

Stainless steel door  
(standard)

Wood door  
with silicon gasket

Stainless steel door for  
SPEZIAL FASS

Stainless steel lid

Total drainage pipe  
in stainless steel

Simple valve

Stainless steel door for Vats  
(Bottom level/standard)

Stainless steel lid  
for Vats

## OUR SERVICE FOR YOU

We are at your disposal for advice about the best barrels for your space and our coopers are always available to pose and repair casks, vats and barriques on request.
